Information about your investment performance

Past performance should not be taken as an indication of future performance

Returns are calculated from historical crediting rates declared or changes in investment unit prices over the period shown.

Returns are after fees, costs and investment earnings tax included in the unit price or crediting rate declared (rebates are excluded). They assume a sum of money invested at the beginning of the time period and not drawn upon or added to throughout that period.

The actual rate of return of your account will vary from those shown depending on individual plan features such as direct fees and taxes you may have to pay and the timing of contributions, switches and withdrawals.

The investment earnings of superannuation and non-superannuation products are subject to different rates of tax which affect the returns.

You should exercise caution in making judgement about the quality of a superannuation fund (superannuation investment option) or investment option based on this past performance. Past performance is not indicative of future performance. Any number of factors can cause performance comparisons to be inaccurate, including:

Asset allocations

The strongest explanation of performance differences between investment options is the amount allocated to different classes (the 'asset allocation'). Different asset allocations arise between investment options in order to achieve their investment objective. Each type of asset allocation has a different level of risk. Typically, growth assets can be more volatile for example, Australian Equities tend to be more volatile than Australian Bonds.

Pricing policies

The methodology used to assess the value of the underlying investments of the investment option, and how often any returns are applied to your account. Sometimes pricing and/or allocation of returns can cause performance to be distorted over time (ie not reflect the actual price you would receive if the underlying assets were sold on that day), which can mean inequities between members returns.

Timing of your contributions

Your returns may differ substantially to those shown, due to the timing of your contribution. This is due to the timing and amount of any deductions or switches from your account including any fees not incorporated into the unit price.

Another thing to consider when comparing performance is your ability to access superannuation when you want it. The frequency that the provider allows redemptions, the amount of the redemption that they can suspend or freeze, which is often impacted by the amount allocated to underlying assets which are not easily sold, and any fees or costs associated with redeeming the investment.

You can find out more about our approach to these items and how they impact on the return in your investment option at amplife.com.au.

What you need to know

This report is issued by AMP Life Limited ABN 84 079 300 379 (AMP Life) which is part of the Resolution Life Group and is the issuer of this/these product/s.

None of AMP Life and/or other companies within the Resolution Life Group or any of the investment managers of the investment options guarantees the performance, the investment options or a particular rate of return. The repayment of capital is not guaranteed, unless expressly stated. Investments in this product are not bank deposits with AMP Life or any other company in the Resolution Life Group. The information in this report is of a general nature only and is based on information available as at the time of production and on sources considered to be reliable. No representation is given in relation to the accuracy or completeness of any statement contained in it.

None of AMP Life or any other company in the Resolution Life Group accept any liability or responsibility for any acts or decisions taken by members based on the information or advice (if any) contained in this report. Any advice (if any) in this document is general in nature and is provided by AMP Life, which is part of the Resolution Life Group. The advice does not take into account your personal objectives, financial situations or needs. Therefore before acting on the advice, you should consider the appropriateness of the advice having regard to those matters and the current Product Disclosure Statement (PDS) or policy document available from AMP Life at amplife.com.au or by calling 133 731, before making a decision about this product. Consider speaking to a financial adviser if you have any concerns. Read our Financial Services Guide for information about our services, including the fees and other benefits that AMP Life and their representatives may receive in relation to products and services provided to you.
